

## CLAIMS

We claim:

- [c1]            1.     A system for viewing, selecting and/or ordering prints of digital images, the system comprising:
- a digital media input portion configured to receive one or more forms of digital media containing digital images;
  - a display screen for viewing at least one of the received digital images; and
  - a coin-counting apparatus configured to receive a plurality of coins and count the plurality of coins to determine a total.
- [c2]            2.     The system of claim 1 wherein the coin-counting apparatus is configured to dispense a voucher for at least a portion of the total of the plurality of coins, and wherein the voucher is redeemable for at least one of cash and merchandize.
- [c3]            3.     The system of claim 1 wherein the coin-counting apparatus includes a coin input region configured to receive a plurality of randomly oriented coins at least approximately simultaneously.
- [c4]            4.     The system of claim 1 wherein at least a portion of the total of the plurality of coins can be selectively applied toward purchase of a print of at least one of the digital images.
- [c5]            5.     The system of claim 1 wherein a first portion of the total of the plurality of coins can be applied toward purchase of a print of at least one of the digital images, and wherein a second portion of the total can be applied toward a voucher that is redeemable for at least one of cash and merchandize.

[c6]           6.       The system of claim 1, further comprising a kiosk positioned in retail location, wherein the coin-counting apparatus and the digital media input portion are part of the kiosk.

[c7]           7.       The system of claim 1, further comprising:  
a coin bin configured to receive at least a portion of the plurality of coins after they have been counted; and  
a communication facility configured to exchange information with a computer located remotely from the coin-counting apparatus, the information relating to status of the coin bin.

[c8]           8.       The system of claim 1, further comprising a communication facility configured to upload selected digital images to a digital photo processing facility located remotely from the system.

[c9]           9.       The system of claim 1, further comprising:  
a user interface configured to receive at least a mailing address for a user;  
and  
a communication facility configured to facilitate uploading of at least one of the received digital images to a remote digital photo processing facility for printing, wherein at least one print of the uploaded digital images is sent to the mailing address of the user.
